# ADTECH METAL PRECISION SERVICES, INC.

## Company History

It all began in 2004 when two friends, Arnel and Delio, sharing similar passion in the metal cutting industry decided to get together to establish ADM Industrial Supply in Tanauan, Batangas.

From the original single proprietorship registration, and a handful of conventional machines, the company grew rapidly and acquired its first CNC Machine in 2007.

In 2010, to further improve its services and to be closer to its growing market base, the partners established a branch in Calamba, Laguna which they called A.D. Tech Engineering.

In 2012, another branch was put up in Clark Freeport Zone in Pampanga. Clark Metal Precision Tech Inc. is now one of the most modern machining and fabrication companies north of Metro Manila.

Truly, the once very modest business partnership has now matured into a modern corporation!

## Mission

Maintain the quality of our professional teams in serving the needs of our clients and establish enduring business relationships for a sustainable corporate growth.
We are also commited to proactively level up our performance based services to stay relevant in tomorrow's world.

## Vision

Be establish and be among the top trusted names in machining and fabrication industry in the Philippines.
Become a globally competitive corporate entity and a general contractor of choice.

## Goals

To increase market share in the industry through adapting new methods and techniques and investment in new technology for higher level competence, enabling us to establish ourselves in the corporate world with desire to have sustainable growth as we envisioned ourselves being accredited as ISO and TQM certified company.

## 5 Pillars

### Capabilities

Achieve a continious annual growth in Operations, Organizational and Financial aspects.

### Capital Efficiency

Maximize the value and return of our investments and expenditures.

### Innovation

Strive for modern and scietific methods.

### Organizational Development

Train and retain our people.

### Sustainable Environment

Set the corporate responsibility as a common mindset of our organization.

## Values

- Dedication to Customer Service
- Trustworthiness and Respect
- Profit with Honor
- Team Work

## WHAT WE DO?

Mainly caters to two types of manufacturing industries: 1) steel, aluminum, rubber, plastic and stainless metal components 2) processing plant that require industrial and semi precision parts.

The initiative to tap other projects such as civil, mechanical, electrical and other installation services is part of its thrust to expand operation

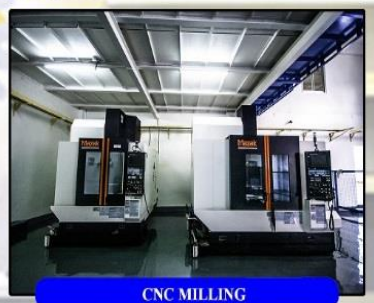

## Nature of Business

- General Machining and Fabrication
- Volume Fabrication (CNC Mass Production)
- Industrial Toolings Fabrication, Precision and Semi-Precision Toolings
- Jigs and Fixtures, Machine Components Design and Fabrication
- Clean Room Equipment Fabrication
- Cabinets, Racks, Tables, Trolleys, Push Carts and Platforms
- General Rubber Design and Fabrication

## Other Services

Engineering services / Project contracting
- Metal frames and Gypsum boards set-up, Ceiling application
- Painting works
